

STAT ADVOCACY POSITION RELATED TO THE TEKS REVIEW

Related to the Science TEKS Review and Revision, STAT asks that the State Board of Education (SBOE), TEA staff and members of the TEKS Review Committee consider the following:

- STAT recommends that standards are created by accessing research-based resources such as *"A Framework for K-12 Science Education."*
- STAT recommends that significant attention is given to intentional vertical and horizontal alignment within the revised TEKS.
- STAT recommends that adequate time is provided both for the workgroups and in the process for soliciting feedback in order to allow appropriate educator and expert engagement with the process.

Adopted by the STAT Board of Directors on February 22, 2020
